\* Length: 6.1 meter (Thickness: 0.6 – 1.5mm) | 6.0 meter (Thickness: 2.0 & 3.0mm)

### 304 Stainless Steel Ornamental Round Tube

**304 Stainless Steel Ornamental Round Tube** provides excellent strength and durability, is easy to cut, bend, and form, and is versatile and affordable enough for a broad spectrum of applications. Its strength and workability makes 304 stainless steel round tube ideal for structural applications where extreme pressure is not involved or for internal applications where aesthetic appearance is not important.

### 316 Stainless Steel Ornamental Round Tube\*

**316 Stainless Steel Ornamental Round Tube** possess greater durability under pressure and higher aesthetic appeal than its less expensive welded counterpart. This stainless steel alloy also provides a versatile choice for a more lightweight means of structural support in corrosive environments. also known as marine grade or surgical stainless steel, is commonly used in the food and pharmacy industry where it is required to minimize metallic contamination.

### Stainless Steel Round Tube Applications

**Stainless Steel Round Tube** is used in numerous types of industrial applications, including:

- Aerospace
- Architecture
- Automotive Decoration
- Bus and Rail Carriage Frame
- Construction
- Display Stands
- Exhaust Pipe
- Furniture Frame
- Grab Bars
- Handrails
- Marine Equipment
- Medical Equipment
- Motorsport Vehicles
- Plumbing
- Signboard
- Structural Applications
- Table Framing
- Turbo Drum Base
