304 Stainless Steel Ornamental Square Tube

304 Stainless Steel Ornamental Square Tube is a versatile choice for a more lightweight means of structural support. Its strength and workability makes 304 Stainless Steel Square Tube best suited for structural applications where extreme pressure is not involved or for internal applications where aesthetic appearance is not important. It also has excellent weight-bearing properties, high corrosion resistance, superior durability, high strength-to-weight ratio, fair resistance to thermal and electrical conductivity and more.

Stainless Steel Ornamental Square Tube Applications

Stainless Steel Ornamental Square Tube is used in numerous types of industrial applications, including:

- Automotive Decoration
- Bus and Rail Carriage Frame
- Display Stands
- Exhaust Pipe
- Furniture Frame
- Gas lines
- Lightweight Structural Applications
- Plumbing
- Signboard
- Table Framing
- Transportation Holds
- Turbo Drum Base
